

Ljubljana, 8.12.2010

### LETTER OF REFERENCE

Dear Sir / Madam,

The Faculty of Mechanical Engineering, University of Ljubljana and RR & CO Ltd. cooperated in 2010 on the coordination and preparation of project proposal REGENERATE. The REGENERATE relates to the large-scale integrated project within the FP7-Cooperation. Due to the specific character of the project and the high number of partners involved, the preparation of the project proposal was highly demanding. Therefore, it would not have been possible to complete it without the help of RR & CO. The company has provided high-level support and consulting services. These were realized in the preparation of the documentation. Furthermore, large efforts have been made in coordinating the communication with all the partners and their interests. The company played a particularly important role in the administrative and financial coordination of the project preparation. The consultants, with their promptness in answering partners' questions and requests, have contributed greatly to the successful preparation of the proposal. RR & CO. has not only proven as a valid administrative partner of the project, but has also contributed notably to the preparation of the work programme providing constructive suggestions and support. Moreover RR & CO. has proven as an indispensable partner of this project offering meticulous administrative coordination of all phases of the project preparation as well as significant support in the preparation of the content of the proposal. This positive experience will certainly result in further cooperation on the preparation of other projects in the future.

We, therefore, strongly recommend RR & CO. as a valuable partner, which can considerably contribute to the successful preparation and implementation of the project thanks to their knowledge, experience and competences.

Sincerely yours,

Assist. prof. Dr. Andrej Kitanovski
